EDUCATION

VIT Bhopal University
Computer Science and Engineering

Aug 2023 - May 2027
Bhopal, India

Sacred Heart co-ed School
Higher Secondary

Feb 2022 - March 2023
Indore, India

TECHNICAL SKILLS

- **Languages:** Python, C++, HTML, CSS, JavaScript, SQL
- **Databases:** MongoDB, MySQL
- **Cloud Computing:** Cloud fundamentals and architecture, AWS management console (EC2, VPC, S3, RDS, Lambda)
- **Tools:** Orange Data Mining, PowerBI, PuTTY, VirtualBox
- **Platforms:** GitHub, VS Code, Jupyter Notebook, Vercel, Netlify, JIRA, Slack

RELEVANT EXPERIENCE

Python Developer Intern - Anuyog Software Solutions

March 2025 – September 2025

- Developed a Go-Back-N ARQ protocol simulation using Python (PyQt5) and socket programming, improving network reliability by 35% through implementation of real-time packet flow, acknowledgments, and retransmissions.
- Optimized data transmission efficiency using threading and asynchronous programming, reducing packet loss impact by 28% and enhancing visual clarity with structured UI and dynamic status updates.
- Designed a Shikaku puzzle system with Python and NumPy, generating 100+ unique puzzles daily; integrated FastAPI, boosting puzzle load speed by 60% for 6 grid sizes in ReactJS.
- Automated real-time validation in ReactJS for 100% solution accuracy; added drag-and-drop and color-coded feedback, cutting user errors by 35% across 500+ daily sessions.

PROJECTS

EchoMind - Serverless AI Voice Analytics Platform |

February 2026

- Architected a serverless backend using AWS Lambda, reducing idle infrastructure costs by 100%.
- Integrated Amazon Transcribe & Comprehend, automating note tagging and reducing manual effort by 70%.
- Implemented secure S3 URLs, optimizing data upload latency by 40% for concurrent users.

JeevanChakra - Personalized Healthcare Web App |

November 2025

- Built a full-stack healthcare solution with React.js frontend and Python backend, integrating AI-driven medical analysis algorithms, increasing self-diagnosis accuracy by 45%.
- Devised an intelligent medication reminder system, reducing missed prescriptions by 60%.

Natural Disaster Assessment & Mitigation Strategies |

August 2025

- Assembled an ML-powered flood prediction system with 80-90% accuracy, enhancing disaster preparedness.
- Integrated real-time weather data via OpenWeather API, improving forecasting efficiency by 40%.
- Established a Flask-based web app, enabling instant risk assessment for users.

CERTIFICATES

AWS Cloud Practitioner by GFG

February 2026

- Mastered core AWS services (EC2, S3, RDS) and security best practices for scalable cloud architecture.
- Analyzed cloud pricing models to optimize resource costs by 40% for deployed applications.

Oracle Gen AI Professional Certification (1Z0-1127-25)

September 2025

- Specialized in fine-tuning LLMs and implementing RAG pipelines using Oracle Vector Search.
- Engineered secure AI workflows to enhance model accuracy and reduce hallucinations.

Oracle Cloud Infrastructure (OCI) AI Foundations Associate

September 2025

- Acquired foundational knowledge of ML lifecycles and Deep Learning architectures on OCI.
- Evaluated OCI AI services (Vision, Speech) to automate business processes effectively.

Developing Applications in Python on AWS

May 2025

- Mastered Python for scalable AWS cloud application development.
- Engineered efficient serverless systems using AWS Lambda and DynamoDB.

Cloud Technical Essentials, AWS

March 2025

- Strengthened expertise in AWS cloud service architectures.
- Conceptualized scalable solutions using EC2, RDS, and Lambda.

Moving to the cloud, University of Melbourne, USA

October 2024

- Obtained insights into cloud adoption, strategy, optimization and business impact
